

Roame Properties

Turn your property inventory into a more engaging discovery experience.

Who it fits

Property groups, estate-agency networks and software operators with listings and an established route to buyers.

The commercial opportunity

Help buyers narrow their choices while giving listing teams a clear route from property submission to enquiry.

Explore a software asset acquisition or defined licence for the scheduled application and workflows.

Explore the workflow

- A source-backed overview of discovery, seller, media and enquiry workflows.
- Request a focused review around your listing model and intended buyer journey.

Define what transfers

- Scheduled property discovery, buyer workspace and seller-listing application components.
- Specified data schema, interface, tests and operating documentation.
- An agreed software licence or acquisition package, with market and branding rights defined separately.

Agree the handover

A scoped environment and data transition, operating walkthrough and fixed support period, with continuing moderation and content responsibilities assigned.

Best suited to a buyer who already has property inventory or agency distribution. Define the territory, listing permissions and customer proposition before agreeing exclusivity.

Discuss Roame Properties for your market
