

TidyFlo

Keep client projects, tasks and next steps in one organised workspace.

Who it fits

Agencies and client-service software providers that want a project workspace within their existing customer offering.

The commercial opportunity

Give teams and clients a shared view of work, responsibility and progress.

Explore a software asset acquisition or defined licence for the scheduled application and workflows.

Explore the workflow

- A source-backed overview of project, task, membership and collaboration components.
- Request a focused review of the client journey you want to offer.

Define what transfers

- Scheduled workspace, project, task and collaboration application components.
- Specified interface, data schema and relevant operating documentation.
- Defined software rights and agreed branding scope for the buyer's client offering.

Agree the handover

A defined workspace setup and knowledge-transfer package, with a fixed transition period and separately scoped future changes.

Best suited to an operator with a clear client-service use case. Resale, sublicensing, custom domains and exclusivity are expressly defined in the agreement.

Discuss TidyFlo for your market
